

Artist Statement

Jackie Griswold is an award winning mixed media artist who uses a variety of materials in her work. She began designing jewelry 25 years ago, moved to photography, and then painting. Most of her work of late is mixed media collage, using papers that she has decorated herself, fabric, lace, and various found objects. Most recently, she has gone back to her roots in jewelry design, making Steampunk inspired pendants and earrings. She continues to be mystified, surprised and excited as she allows her intuition to guide her work.
